

### Enhanced Functionality

- **Ability to search ISBN, ISSN and LCCN indexes in OCLC WorldCat**

When OCLC WorldCat is the selected database, the Advanced Search facility now supports searching of ISBN, ISSN and LCCN indexes through the 'Number' search option in the drop-down boxes.

- **Information passed from APAIS to Copies Direct is correctly rendered**

When an article is selected in an APAIS search result, the 'At Other Libraries' or 'Bookshop/Suppliers' tab clicked, and the 'Request a Photocopy Through Your Library' or 'Order a Copy from Copies Direct' option selected, the information in the Copies Direct form is correctly populated. The journal title, issue number and pagination appear in the Title field. The author and article title appear in the Item Required field.
