

**LIBRARIES AUSTRALIA
POST IMPLEMENTATION REVIEW**

Following the completion of the Kinetica Redevelopment Project in November 2005, the National Library has undertaken a post-implementation review (PIR) of the new Libraries Australia service. The review was undertaken by Ernst and Young.

The purpose of the review was to:

- ascertain whether the Kinetica Redevelopment Project has achieved its objectives and addressed the original business requirements; and
- gain an understanding of the project process in order to identify and shortcomings in order to improve processes for future project activity at the Library.

The report is attached. **(Attachment A)**

Recommendation

That the Libraries Australia Advisory Committee note the report.
